Technical Specifications

FABRIC TYPE

Name of Fabric: Recsystem®
Base Fabric: 100% Solution dyed acrylic fibers

CHARACTERISTICS

Width: 60" / 152 cm +/- 1%
Weight: 9.6 oz. +/- 5% (UNE 53352)
Standard Put Up: 65.6 yards / 60 meters
Finish: Acrylic resin under side, Fluorocarbon finished both sides
Water Column: > 1000 mm (UNE EN ISO 20811)
Styles: 19 solids
Limited Warranty: 5 years

SAFETY, HEALTH AND ENVIRONMENT

UPF (Ultraviolet Protection Factor): UV50 (Excellent Protection) AS-NZS 4399

Properties

Extremely water resistant

Color fastness

Excellent UV Protection

Thermal comfort

Infinity Process

Water and oil repellent

Resistance to mold, bacteria and fungi

In response to increasing demand for an acrylic fabric that has superior performance under extreme weather conditions, we present Recsystem®, a highly durable resin back coated solution-dyed acrylic for the Marine and Awning Industry.

- Outstanding fade resistance only solution-dyed acrylic fabrics can provide.
- Withstands harshest weather conditions.
- Blocks up to 99% of harmful UV rays.
- Dirt and oil repellent, mildew resistant, and antibacterial.
- Superior water resistance due to double coating (fluorocarbon on both sides, acrylic resin underside).
- Will not unravel when scissor or knife cut.
- Fabric panels can be joined with welding tape.

New undercoating

Our new undercoating is nearly invisible from most angles, contains two different and highly effective antimicrobial agents, eliminates leaking and misting in driving rainstorms, and is highly resistant to creasing and marking.
